BUILT SPECIFICALLY FOR PRESCRIBERS

DoseSpot reporting was developed using requirements from our clinical users and their teams to ensure you have access to the data you need at the click of a button. With filters available for all reports including location, clinic, date, prescription status, and more—get the reliable data you need, anytime.

REPORTS BY CATEGORY

PRESCRIPTION REVIEW

Ensure timely medication management and quality control

- **Prescription by Date Range:** Listing report for all prescriptions filtered by clinic, clinician, and/or prescription status.
- **All Outstanding Transmission Errors:** Stay on top of any transmission issues.
- **All Outstanding Refill Requests:** Ensure clinicians are responding to requests sent from the pharmacy and show any refills for clinicians that have not been approved or denied.
- **Refill Responses:** Enable clinicians and practice managers to see the outcomes of refill requests.

SECURITY AND COMPLIANCE

Protect patient data and address state and federal ePrescribing mandates

- **EPCS Audit Trail Report:** Save time and prepare for EPCS audits with Electronic Prescriptions for Controlled Substances (EPCS) status reporting for certification.
- **EPCS Incident Report:** Review error/success for each step of IDP and TFA and any failed “ready to sign” attempt.
- **MIPS Report:** Merit-Based Incentive Payment System (MIPS) and Interoperability reporting for Meaningful Use eligibility and certification.
- **PDMP/NARX:** Utilize NARX scores to identify risk, receive full PDMP report, and access multi-state reporting.

OPERATIONAL EFFICIENCY

Simplify and save time with clinical, patient, and billing information at your fingertips

- **Billing Group Overview:** Organizational report of billing groups for all Practice Management Groups.
- **Clinician Report:** Track how many new clinicians are using the software to write prescriptions within a given period.
- **Clinic Group:** Group patients that are seen at multiple locations and billing groups attached to those clinics.
- **Duplicate Patient Reports:** Keep data clean for practices with patients in multiple locations.
